

Tekniker/Technician på Cobolt AB – 2 positions

Har du någonsin funderat på en karriär inom avancerad laserutveckling?

Have you ever considered getting into the laser business?

Cobolt AB design, manufacture and supply high performance lasers. The company's high quality laser products are key components in advanced analytical instrumentation equipment used in life science, quality control and industrial metrology applications. The customer base is highly international, consisting of leading instrument manufacturers and research labs world-wide and over the recent years we have experienced strong growth.

As a technician you will help us to reach our growth goals by assisting in laser production. Depending on your experience and skills you could work with some or many of our manufacturing processes. These might include alignment of optical elements, operation of specialist mounting equipment, soldering and mounting electronics boards, running testing procedures or even signing off on manufactured lasers prior to shipment.

Your skills

- We believe that you are a structured person who can work close together with others
- You will be independent while still working as a team
- You will have a strong focus on good quality and understand when accuracy is needed
- No previous experience in manufacturing is required

About Cobolt AB

Cobolt was founded in 2000 and has its headquarters, including R&D, production and sales management, in Solna, Sweden.
